### About Me

I am an enthusiastic and dedicated web developer with a strong passion for creating engaging and user-friendly websites. As a fresher in the field of web development, I am eager to apply the knowledge and skills I have acquired through my education and personal projects to contribute to the success of a dynamic organization.

### Projects

#### Blog Website using MERN stack

Key learnings:

- Using Express js for handling routes
- Using MongoDB for managing the database
- Using React with HTML CSS to create frontend
- Using git for version control.

#### News Component using HTML CSS JS

Key learnings:

- Using grid and flexbox for page layout
- Using BEM convention for naming component classes
- Using utility classes to manipulate page using JS
- Designing responsive navigation menu

#### Intro Component with Signup Form using HTML CSS JS

Key learnings:

- Creating a responsive layout
- Using JS for form validation
- Displaying different errors in case validation fails
- Using mobile-first workflow

#### Snake game using Vanilla JS

Key learnings:

- Using JS to build game logic
- Using grid to create game board
- Updating dom to show snake movement
- Adding touch buttons to make it accessible of mobile and pc
